

THE SUN ON THE WATER

2 Kings 3

One of the amazing ways in which the Lord protected Israel from an attack by the Moabites was the way the Lord caused the sun to shine on the water that had filled the ditches so that it looked like blood. It is hard to imagine what that might have looked like, but you can dramatize it by coloring the two pictures below.

Color the top picture using blue for the water. Color the hills and the land in browns and grays. Then color the bottom one exactly the same, except make the water blood red.
