

## **Nature Walk: Focus on Feathers**

- 1) Go for a walk and pick up feathers. See how many kinds of feathers you can find and compare them to see the similarities and differences.
- 2) Did you find any long feathers? The longer feathers found in a bird's wings and tail help birds fly. Think of each truth in the Word as a "flight" feather, ready to lift you to a higher place.
- 3) If you examine one of the "flight" feathers with a magnifying lens, you can see the little "hooks" that hold the strands of the feather together.
- 4) Did you find any short, downy feathers? These shorter, fluffier feathers help keep a bird warm, insulating it in cold weather. Are there truths that keep us feeling warm and loved such as the truth that the Lord loves everyone?
- 5) What color is the most beautiful feather that you have found?
