

# MAKE A PALM BRANCH

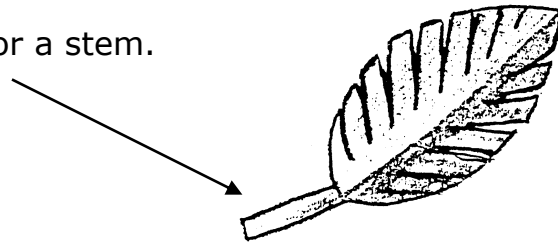

Adapted from the Early Childhood Program

*Have your children create their own palm branches.*

1. Fold a rectangular piece of green paper in half length-wise. Cut away the edges as shown to form a leaf shape.

2. Slash the edges through both thicknesses on the side opposite the fold.
3. Open the branch out and glue it to a narrow strip of cardboard for a stem.

## ***Alternate Way to Make a Palm Branch***

1. Another way to make palm branches is to cut a simple leaf outline out of green paper.
2. Then cut short strips of a different shade of green paper and glue them to the leaf outline as shown.
3. Let dry.
