

Construct a Tower | The Tower of Babel

Make a “tower of Babel” using wooden or cardboard blocks with a family or group without talking.

Supplies needed

- Wooden or cardboard blocks, or stackable containers

Directions

1. Tell everyone you will be building a tower together. The goal is to make it as high as possible.
2. To begin with, everyone is allowed to talk about what they are doing.
3. After a while, tell everyone they can no longer talk. This represents the fact that people could not understand each other while building the tower of Babel.
4. After the tower is built talk about why it might have been difficult for the people in the story to finish building the tower.
