

Nativity Luminary

Create a project showing the brilliant light of truth the Lord brought into the world at His coming.

Materials Needed

glass jar

Nativity Luminary Template picture printed on white paper

electric or wax votive candle

small piece yellow tissue paper

dark blue tissue

glue

paintbrush

scissors

Directions

1. Choose the *Nativity Luminary Template* that best fits the jar you have chosen.
2. Cut out and discard the white areas.
3. Turn the *Nativity Luminary Template* over so the back is showing. Spread glue all around the “light” at the top of the picture using a paint brush. Lay the yellow tissue over it.
4. Turn the template over so the front is facing you. Using the paintbrush, glue the template to the outside of the jar.
5. Tear the dark blue tissue into small pieces. Glue the pieces all over the jar, being careful not to cover the yellow light.
6. While the glue is wet, make small holes in the tissue with the point of the scissors. These will look like stars the project is finished.
7. Allow the glue to dry.
8. Put an electric or wax votive candle inside the jar.

Nativity Luminary Templates

Choose a template to fit your jar. Cut out white areas. Keep black areas.
