

## The Woman Clothed with the Sun Stained Glass Project

This project helps children remember the vision of the woman clothed with the sun, an important symbol for the New Church.

### Supplies needed

- picture of the Woman Clothed with the Sun printed on white paper
- crayons or oil pastels
- cooking oil
- paper towels

### Directions

1. Carefully color the picture of the Woman Clothed with the Sun using crayons or oil pastels. The heavy black lines are there to suggest the dark leading of a stained glass window that you might see in a church.
2. Turn the picture over. Brush the back of the picture with a paper towel soaked in cooking oil. This will make the picture translucent.
3. Display the "stained glass" picture in a window where light will illuminate it.
