

Reborn Butterfly

A Gift to Make for Young Children

by Wendy Soneson

(This project was originally published in *New Church Home*, vol. 49.)

A rather complicated, but charming toy can be made to show the transformation of a caterpillar into a butterfly.

1. Make a three-dimensional butterfly using felt or lightweight double-knit fabric.
2. Decorate gaily with yarn, felt, beads, *etc.*
3. Leave a pocket opening, and make a caterpillar for it with yarn legs and feelers.
4. Attach the two creatures at the opening with a two-sided zipper.
5. One can then "turn into" the other.
