

Simple Stand-up Paper Angel

Your choice of paper is the way you can make this project special! A textured white or off-white paper will make this angel something your students will treasure.

1. Copy angel on to heavy-weight paper.
2. Cut along all the solid lines.
3. If desired you can decorate the angel with special pens, glitter etc.
4. Overlap the wings and use the cutting lines as “slots” to make the angel stand.
5. If desired you can use a little tape on the inside of the angel to make it stay. (If you do not tape, it will collapse flat easily for good transport home and can be taped later.)
