

Star of Wonder

To picture the Star in the dark of night, try using one of these methods:

1. Cut a star from silver or gold foil and glue to dark background.
2. Make a star from white paper, glue on dark background, and add glitter.
3. Using oil pastels or chalk on dark paper, make the bright star seen by the wise men and smaller stars as well.
4. Use wax crayons or oil pastel crayons to make this star on white paper. Be sure to cover the star with lots of crayoning! Then brush dark blue or black watercolor paint (or thin poster paint) over the star and background.
