

# Where's Your Head?

This project illustrates how our priorities and motivation affect how we appear in the light of heaven. Priorities and motivation really show what our ruling love or main love is. There are four possible main loves, illustrated in the circle diagram. If you think from love of the Lord then you will appear right side up. But people who think and act from the love of self appear to be upside down when seen in the light of heaven (see *Apocalypse Revealed* 951:9). This diagram shows that love of the world and love of self can be good loves, if they are not the main focus. We spend most of our lives trying to put our loves in the right order. Lower loves belong at our "feet" and the higher ones up above. This is a gradual process which takes a lifetime and is called "Regeneration."

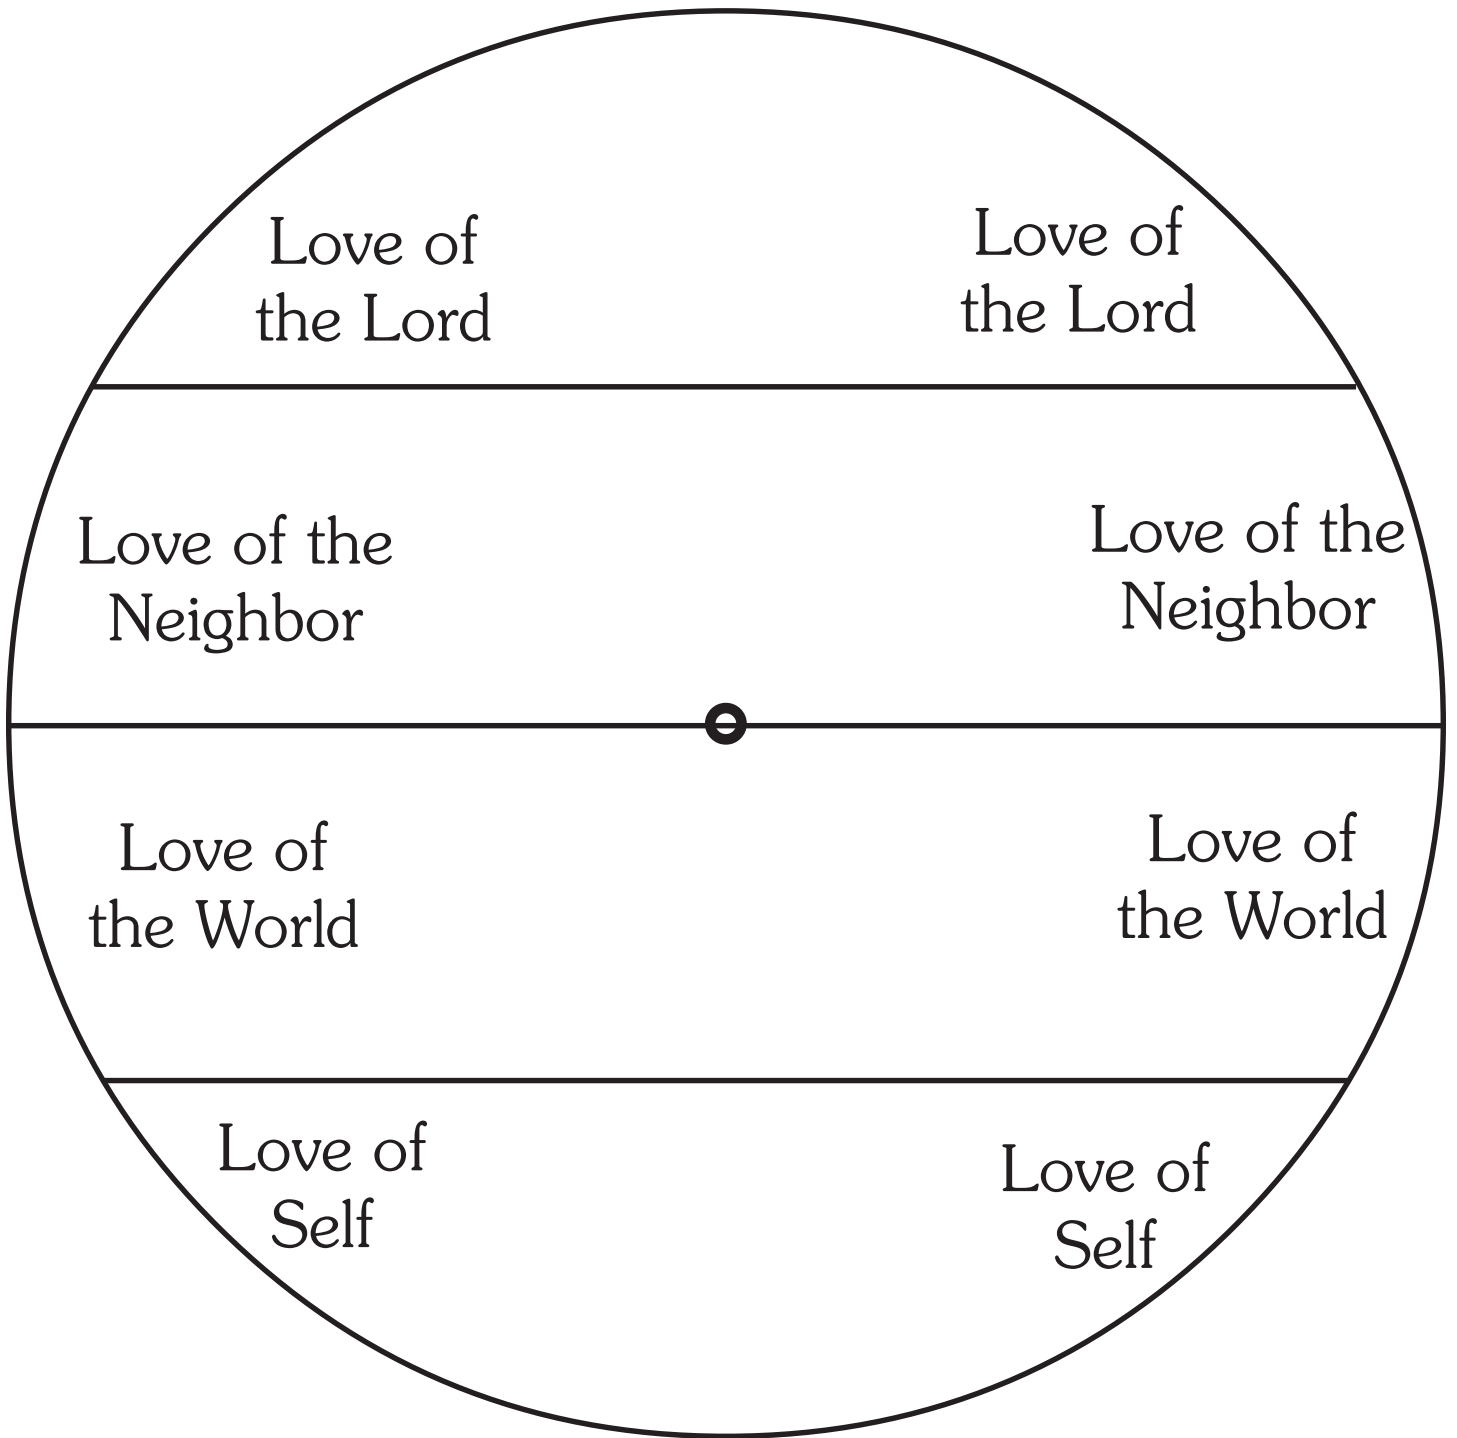

## Directions:

1. Choose either the male or female figure to color and cut out.
2. Insert a paper fastener or brad through the middle of your figure and then through the center of the circle diagram.
3. Spin the figure around to show how people appear in the light of heaven depending on what their ruling love is. (Remember that we all spend a lot of time in this world "on our sides" as we work on prioritizing our loves.)
